

E-T-A Announces a Unique Distribution Partnership with Germany's Leading Vehicle Connector Manufacturer

E-T-A Circuit Breakers announces that it will distribute AK Teck electric vehicle connectors in Canada. AK Teck has been manufacturing electrical components and systems for commercial vehicles in Germany since 1918.

“Since E-T-A has substantial business in the transportation sector it has established a strong strategic partnership with AK Teck in Germany,” explains Bob Ashmore, Managing Director for E-T-A Canada. “It therefore makes a lot of sense for E-T-A to distribute this impressive line of high quality German made connectors and terminal blocks in Canada”.

E-T-A's transportation product offering ranges from miniaturized, cost effective automotive breakers to heavy-duty battery isolation switches for OEMs and Retrofitters. Applications include all vehicle power management systems for: cars, trucks, buses, agricultural and construction equipment, emergency vehicles, motorhomes, logging and mining equipment.

The AK Teck comprehensive product line fits very well with these Canadian applications. The line includes: connectors, cabling systems, push-buttons and switches, bridges and receptacle plus much more. AK Teck is also known for customized solutions for specific and difficult applications.
